

Effective LabVIEW Code Reuse: Strategies and Tools

Presented by:
Omar Mussa & Jim Kring
at NIWeek 2008

1

Jim Kring

- JKI Founder and CEO
- Certified LabVIEW Architect
- “LabVIEW for Everyone” Author
- OpenG Founder

Omar Mussa

- Certified LabVIEW Architect
- Creator: VIPM Project Scanning
- LabVIEW OOP and DB Expert

LabVIEW Reuse

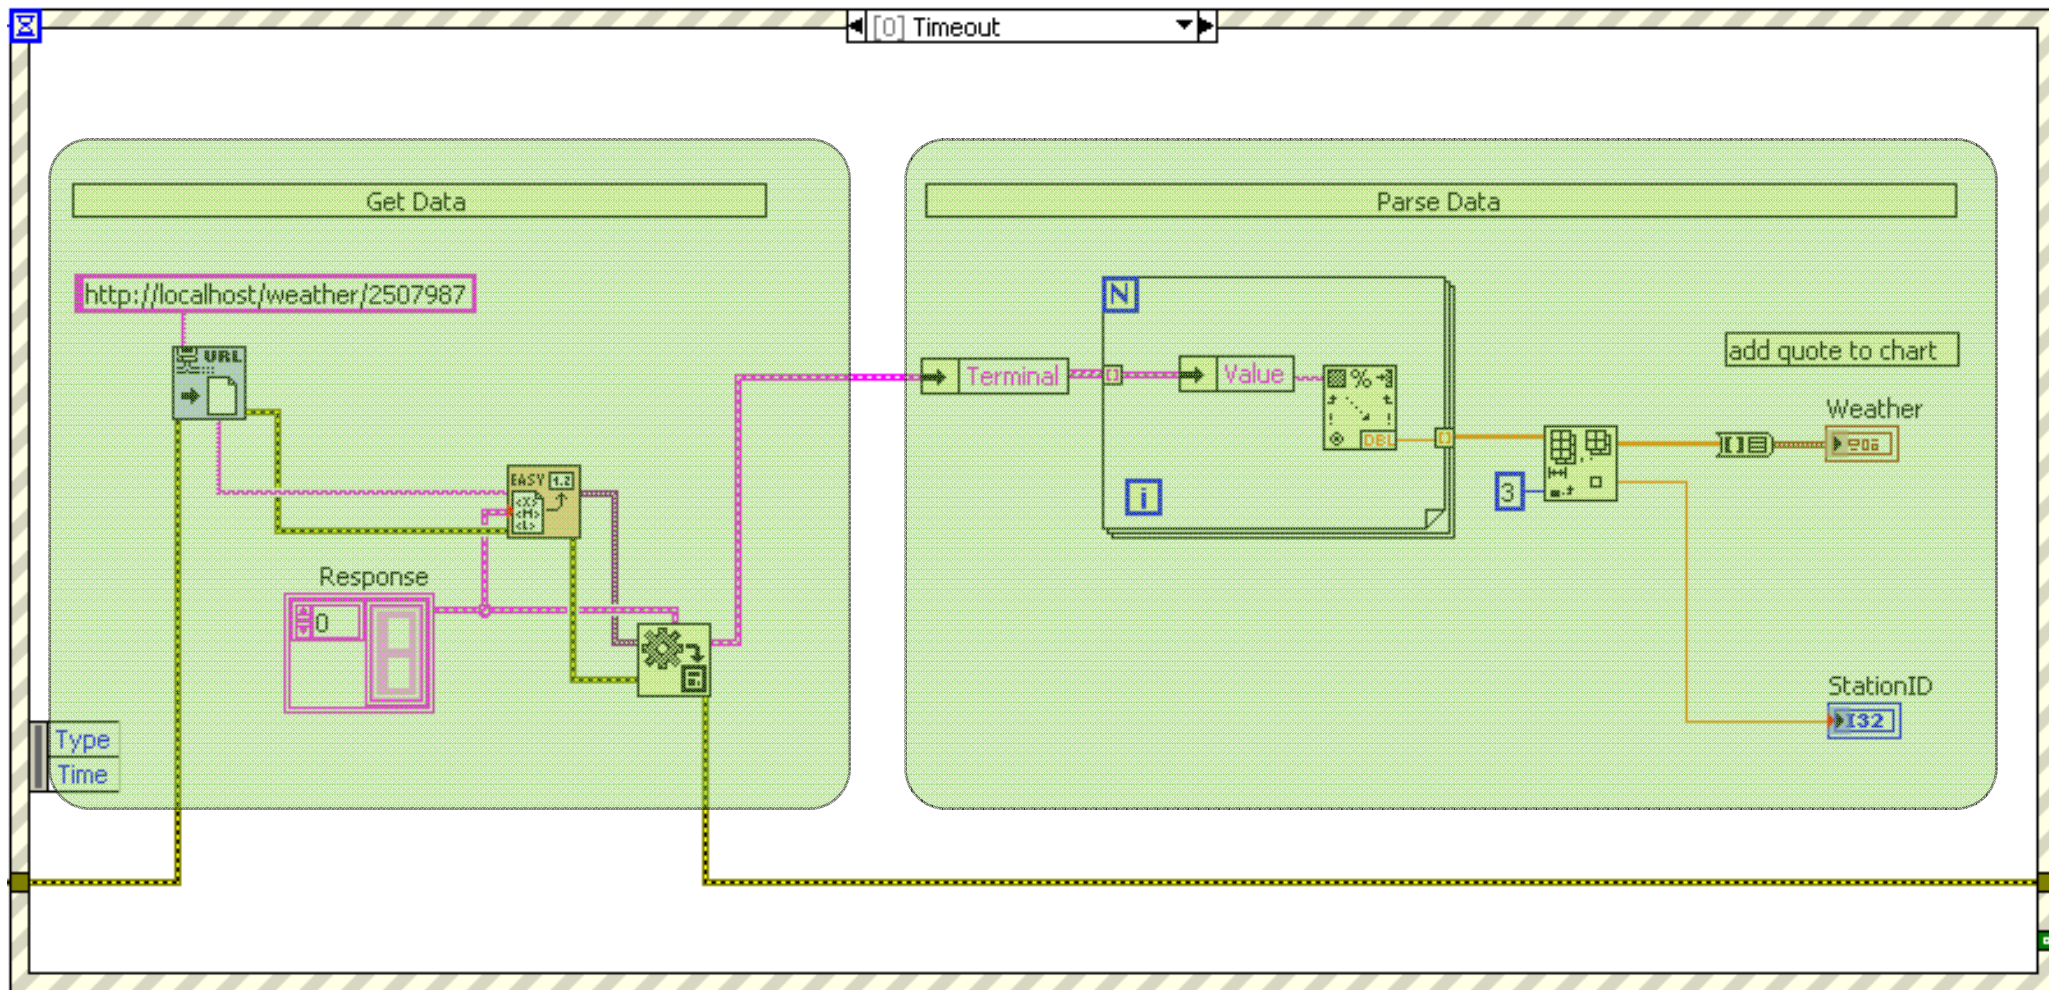

Title: Reduce, reuse, recycleCredit: <http://www.flickr.com/photos/chicanerii/>

3

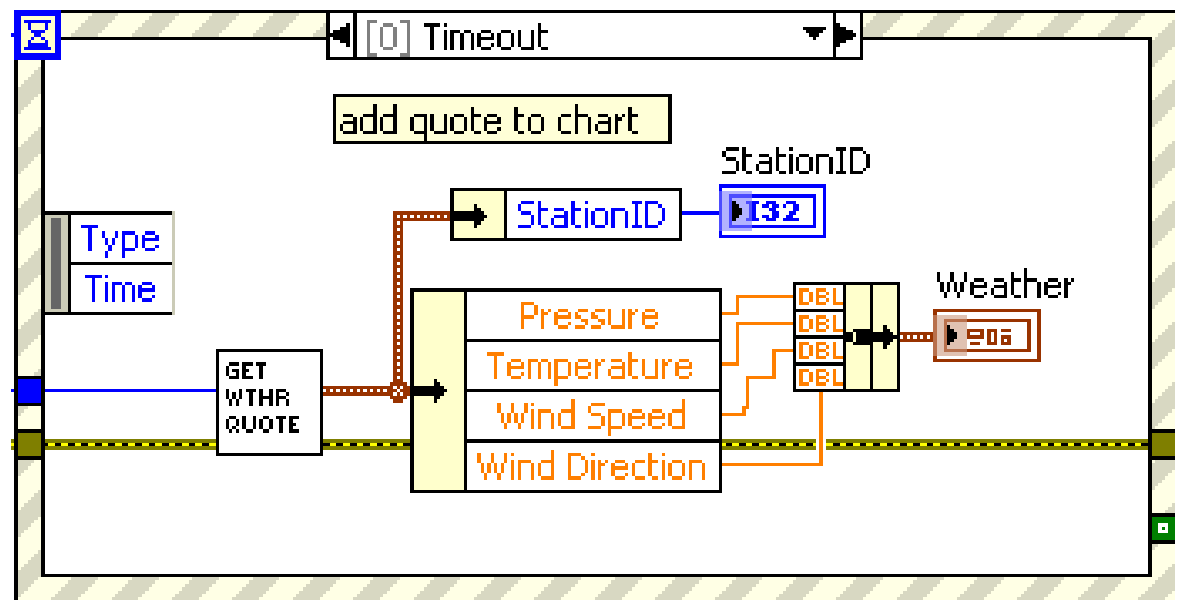

A reuse process begins ...

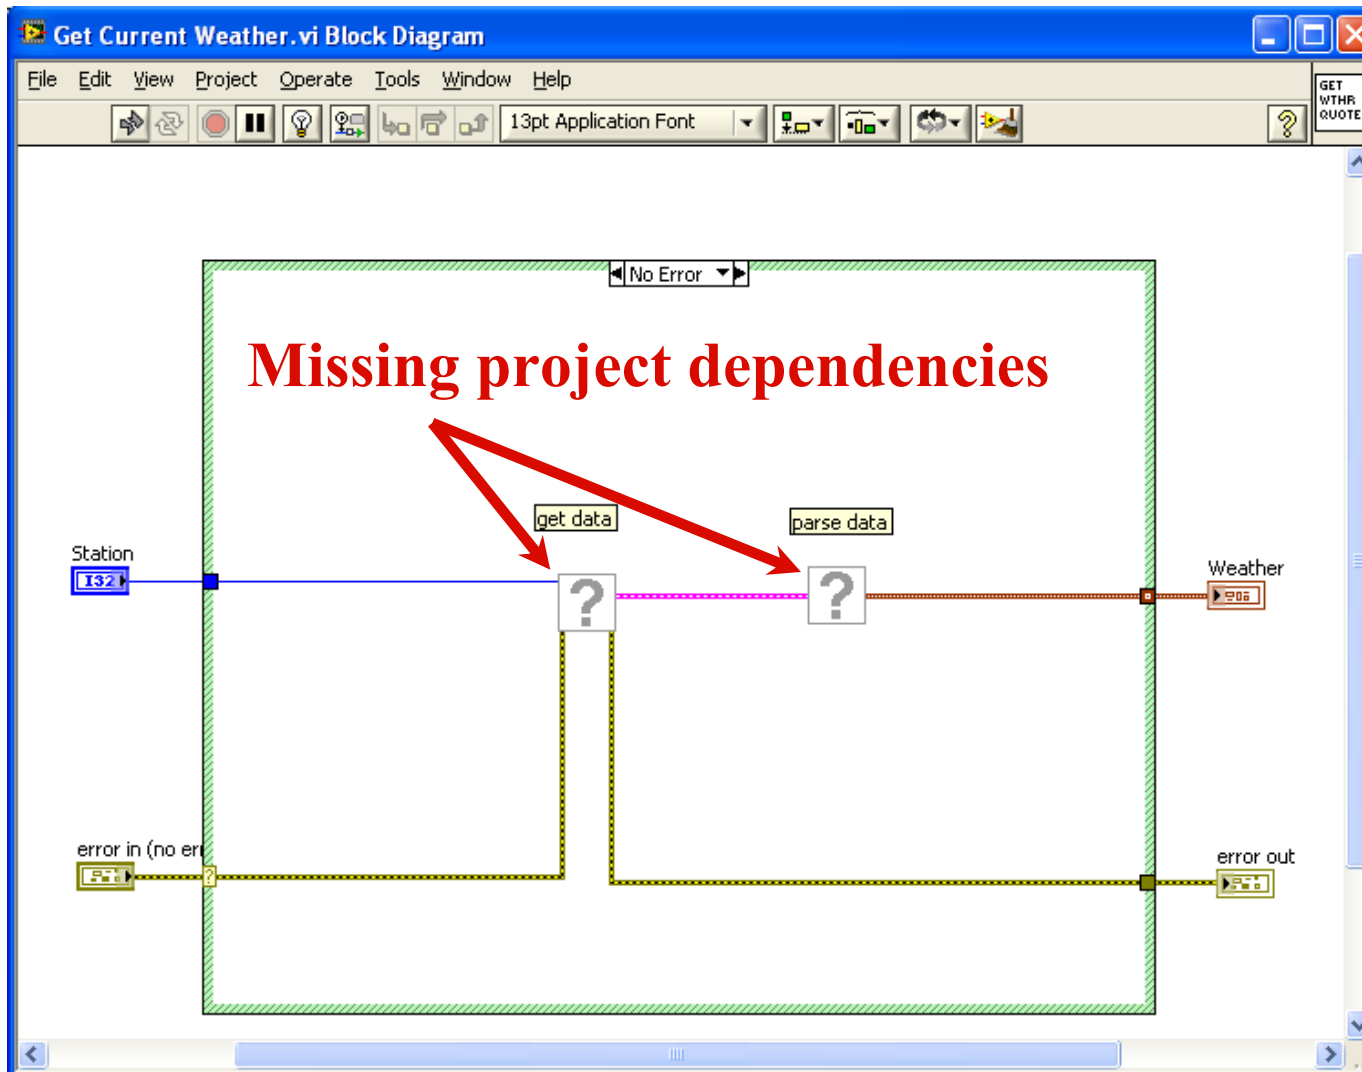

Code evolved

- Create sub-VIs
- Apply style guidelines
- Design for reuse

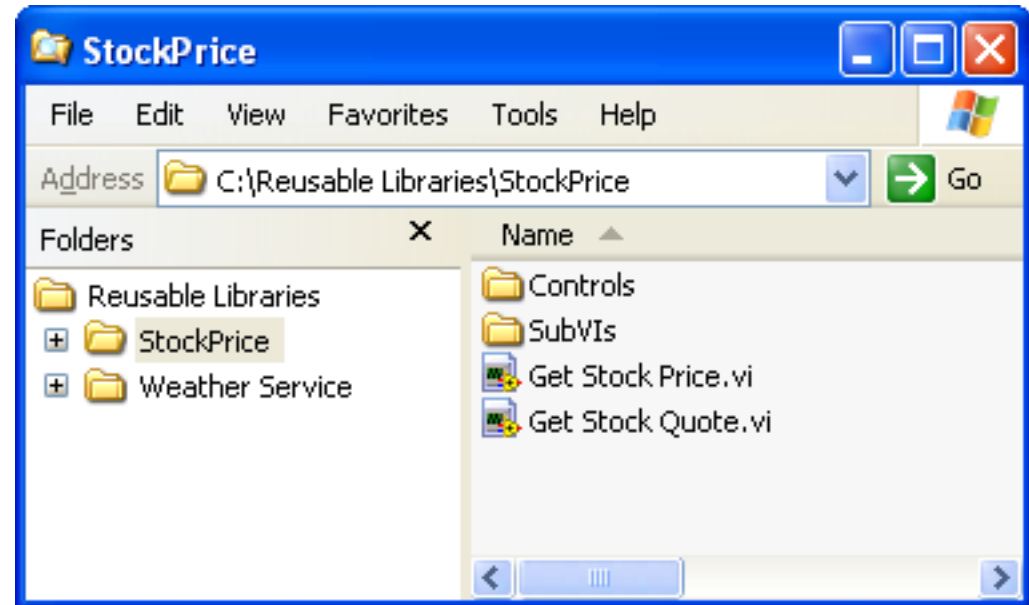

Deployed to a new project

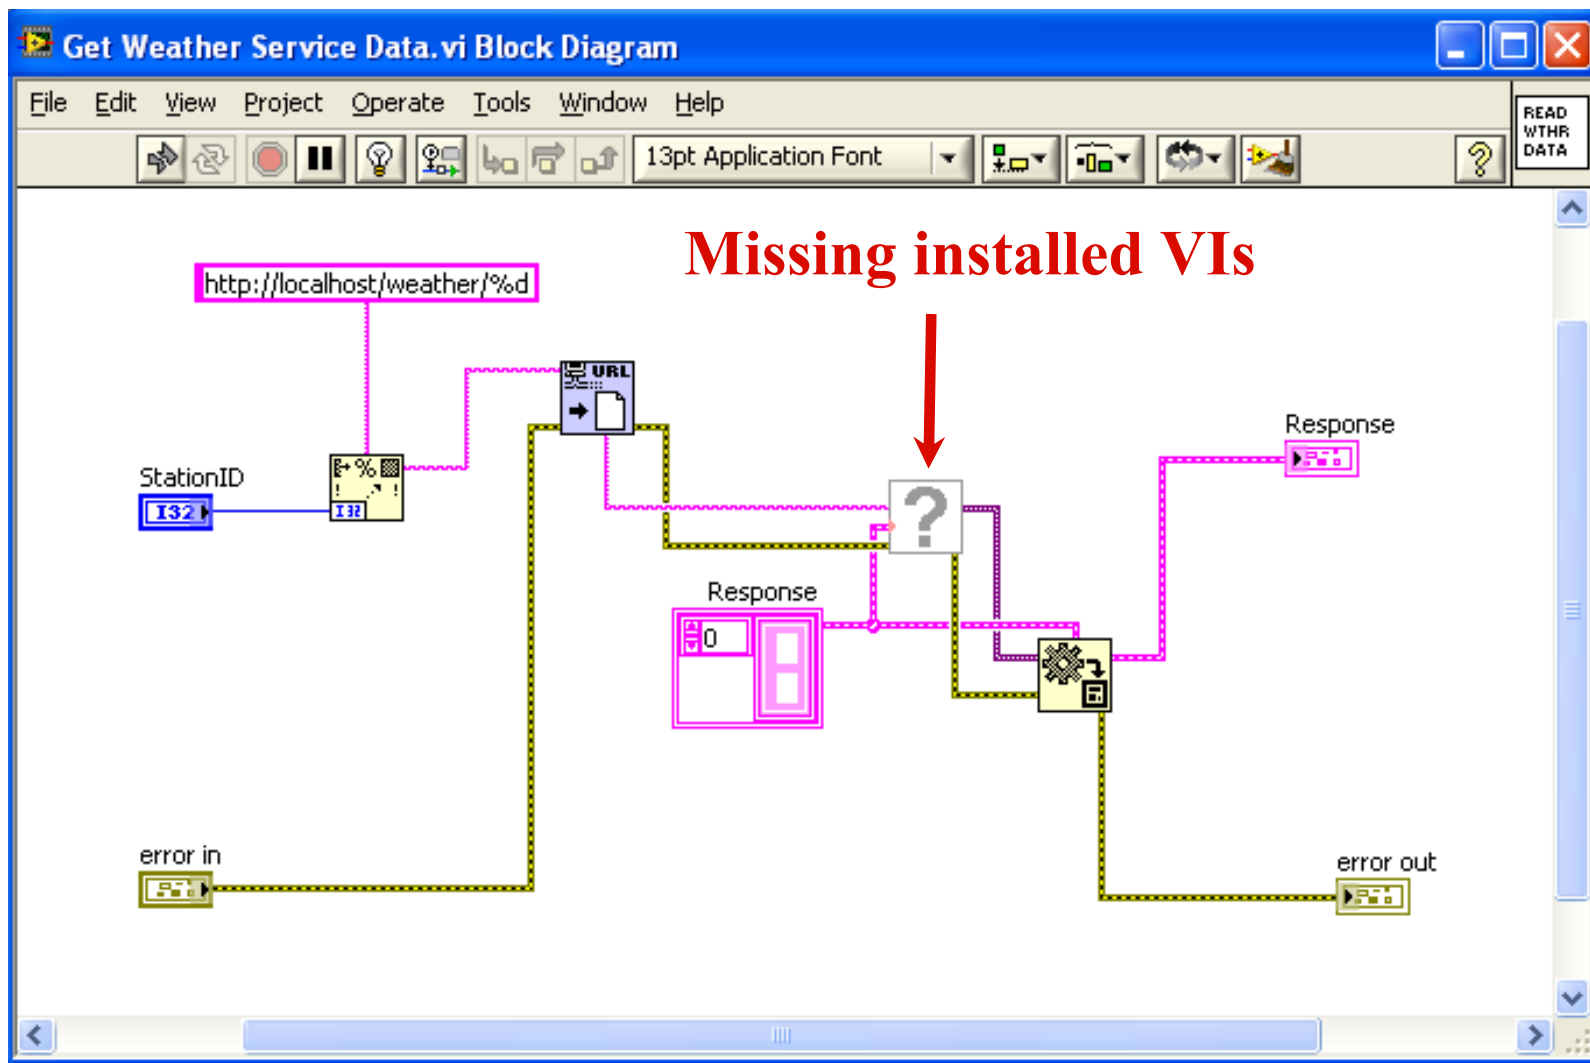

Reorganize project into folders

- Easier to manage
- Searchable
(via File System)
- Can monitor status
(via SCC Tools)

Migrated to a new computer

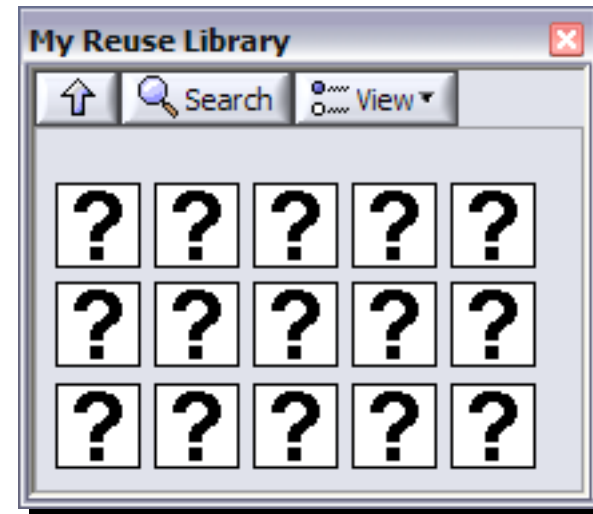

Where are your VIs?

- Missing on block diagram

- Missing on palettes

9

Other problems emerge

- Name Collisions

- Version Management

What happened?

11

Monolithic Reuse Library

- Benefits
 - Easy to create
 - Easy to distribute
- Drawbacks
 - Difficult to manage
 - Easy to branch/fork
 - **HARD TO MAINTAIN**

Title: Monolith

Reuse library grew complex

13

You abandoned the reuse library

14

Good Intentions

Improve quality

Save time

Save money

Your results

Overwhelmed

Frustrated

Re-
Engineering

You have a problem...

Reuse library dimensions

- Reuse components
- Dependencies
- Versions

Define a reuse solution

Reuse library goals

- Accessible
- Scalable
- Portable
- Modular
- Easy

Accessibility

21

Scalability

22

Portability

23

Modular

Using reuse tools in our process

Configuration

LabVIEW Projects

Why we know it works ...

- JKI uses it internally for our reuse process.
- Used to distribute the largest LabVIEW reusable library ...

Why we know it works ...

“The VIPM is an integral component of our overall test software reuse strategy. Its features, ease of use and direct integration into LabVIEW™ made it the clear choice as a core component of a comprehensive test software reuse and development environment configuration management solution at V I Engineering, Inc.”

Christopher G. Relf
Certified LabVIEW Architect
Chief Architect - V I Engineering, Inc.

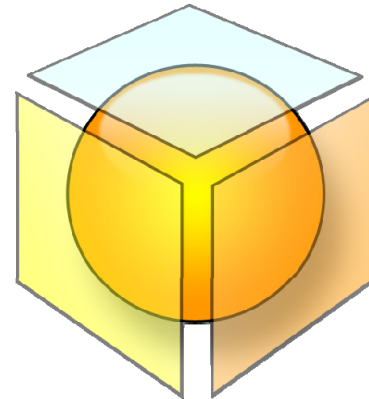

Conclusions

- Reuse is important
- Process is critical
- Tools exist to **simplify your process**
